

Ecampus clarification for Core Ed Courses that have submitted Statement of Intent

Ecampus is ready for proposals to be submitted based on SOIs accepted as soon as possible. Ecampus is expecting a high volume of Core Ed courses to be developed/redeveloped so they want the proposal submitted soon but can intend to the developed/redeveloped over a year from now.

For example, 2-term develop/redevelop could be either Fall & Winter '24-'25 or winter& spring '25-'25. Ecampus plans to do the best they can to accommodate everyone's ideal development times but will have to negotiate as the time gets closer. Consider that developing an Ecampus course may help with the development of on campus content so plan to maximize your efficiency.

Ingrid Skoog (Ingrid.Skoog@oregonstate.edu) can support submitting the proposal so please have the faculty to reach out if they would like support. We need to submit all proposals as soon as possible and prioritize those that want a Summer or Fall '25 first offering.

Information for proposals include the following:

1. Proposed terms of development
2. Term of first offering
3. Faculty developer(s)
4. If a redevelopment, the category of development (see below)

Ecampus redevelopment categories:

1. **Fully funded redevelopment:** This follows the same two-term process that we use for regular Ecampus course redevelopments. Select this option for courses that have not been formally redeveloped in more than three years. (\$5000 from Ecampus is expected)
2. **Partial redevelopment:** You can request this option for courses that have been recently developed (winter term 2022 or later). Although still a two-term timeline, it would be a lighter workload with a focus on updating just the key components that need to be changed. Media revisions would be limited. Partial funding would be offered. (\$2500 from Ecampus is expected)
3. **Course maintenance update:** This option is ideal for courses that have been recently developed but will need 10% or less updated. This is an unfunded effort and includes no media updates, but it can be expedited within one term. (\$0)
