Purpose of the Rate Area Findings Report Document

This Rate Area Findings Report (formerly known as the Supplemental Report) describes how child care prices vary by age group, type of care, and Oregon's current subsidy rate areas. Analyzing data by the existing three rate areas allows us to compare 2024 market prices with the maximum payment rates currently used by the Employment Related Day Care (ERDC) program. This document presents the 2024 market price findings by type of care using the three ERDC rate areas (A, B, C). This report is to be used as a tool alongside the 2024 Market Price Study Report¹, which uses statistical clustering to define price clusters across the state.

For many years now, the geographic price clusters defined using a statistical clustering approach are not aligned with the three rate areas (A, B, & C) used for ERDC. This report further illustrates that the three rate areas are no longer a valid representation of how market prices group geographically, as provider pricing practices have changed over time.

Historical Background on Rate Area Analyses

In Oregon, market price studies have been conducted approximately every two years from 1990 forward. All studies relied on data collected by Child Care Resource and Referral Agencies (CCR&R), and all but one involved analysis of data stored in the CCR&R database; the 1999 study involved a survey of a sample of providers drawn from that database. Since 1994 (with the exception of the 1999 survey) researchers have analyzed the market price data by zip code looking for price clusters.

Through 2008 researchers found prices for centers, large home-based care, and small home-based care² to cluster into three groups known as rate areas. In the Oregon market price studies for 2010 and 2012, analyses of prices indicated that there were changes in how providers were pricing services and that the three clusters may no longer accurately describe variation in prices across the state. Analyses indicated that center and large home-based child care prices were steadily increasing and that prices of small home-based child care providers were stagnating. In addition, programs were increasingly moving into the highest rate areas or remaining in the current rate area, in part, due to an ERDC policy that no zip code should move to a lower rate area. Additionally, higher zip code average prices for centers and large home-based care sometimes pulled small home-based child care homes into a higher rate area. There were also signs that center and small home-based child care prices were not clustering in similar ways. These findings raised questions about whether or not the three rate areas were accurately describing prices in the child care market.

In analyzing the 2014 and 2016 data, a continuation of the trends observed in 2010 and 2012 data were found. Using guidance from a national study on market price surveys, the OSU research team looked into alternative methods to identify zip code areas with similar child care prices. After careful consideration, the team decided to use a statistical clustering method that looks for groups or clusters that occur in the data and provides a systematic way to find the optimal natural breaks between groups. This method was used in the 2014, 2016, 2018, 2020, 2022, and 2024 Market Price Studies. The findings of the 2024 cluster analysis approach can be found in the 2024 Oregon Child Care Market Price Study¹.

Data Source

This ERDC rate-area focused analysis includes child care facilities in the priced child care market. Given that almost all centers and small and large home-based care are captured in Find Child Care Oregon, the Child Care Resource and Referral (CCR&R) database, this database was used for the 2024 Market Price Study. Central Coordination at Western Oregon University facilitates a data update process in which data on capacity and price by age group were collected from active Oregon child care facilities within a three-month period (October - December) to ensure all data were comparable and current. This included 4,898 facility records

¹ Full report can be found at health.oregonstate.edu/early-learners/research/oregon-child-care-market-price-study-2024

² Home-based child care providers are typically identified by their regulatory status: a) small home-based providers are known as registered family child care, and b) large home-based providers are known as certified family child care. This report also includes a small number of license-exempt home-based providers who accept referrals from their local CCR&R and license-exempt centers that reported full time prices charged to families. We use the terms small and large home-based care throughout this report.

that were active as of December 2024. After facility records without price data and those that were not considered part of the child care market were eliminated, the final sample was 2,656 facilities including 1,001 (38%) small home-based care, 883 (33%) centers, and 772 (29%) large home-based care providers.

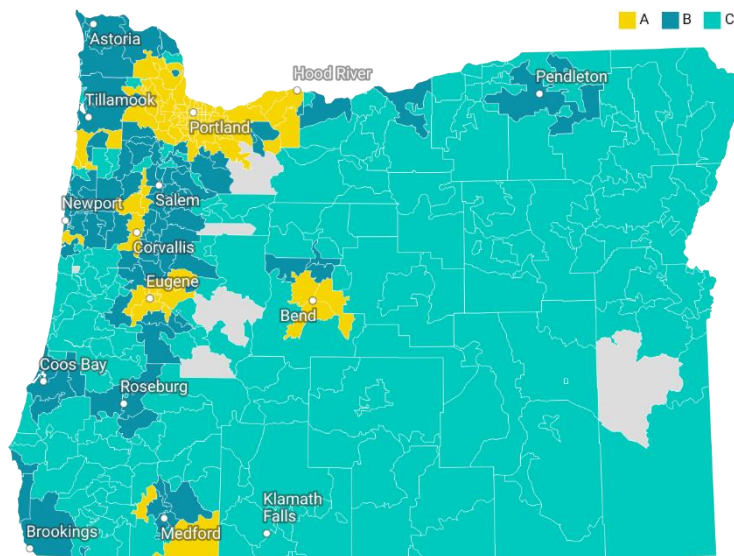

Subsidy Rate Areas and Maximum Subsidy Rates

The Employment Related Day Care (ERDC) program helps families who are working, in school, or receiving Temporary Assistance for Needy Families (TANF) pay for child care. For families approved for ERDC, the Department of Early Learning and Care (DEL) pays a portion of the child care bill directly to their provider. Families also pay a copay to the provider every month and are responsible for any additional costs above and beyond the rate maximums.

Subsidy reimbursement rates are divided into three rate areas based on zip code, see Map 1. Although a handful of zip codes have changed rate area over time, most zip codes have remained in the same rate area since 2008.

- **Rate Area A** contains zip codes that historically have had some of the highest prices and therefore receives the highest reimbursement rate. This includes zip codes in and around the Portland metropolitan area, Eugene/Springfield, Corvallis, Monmouth/Independence, Hood River, Mount Hood, St. Helens/Scappoose, Pacific City/Neskowin, Seal Rock, Ashland, Bend, Newberg, Forest Grove, Banks, Gaston, and surrounding areas. This rate area includes 56% of all child care facilities.
- **Rate Area B** includes the cities of Salem, Medford, Roseburg, Woodburn, Albany, Redmond, Pendleton, as well as areas outside the metropolitan areas in Eugene and Portland, most of the Mid-Willamette Valley, and areas along the north, mid, and southern coast. This rate area includes 33% of all child care facilities.
- **Rate Area C** includes all communities not in Area A or B, including most of Oregon’s rural areas. This rate area includes 12% of all child care facilities.

Map 1. 2024 Employment Related Day Care Rate Areas

The ERDC Maximum Reimbursement Rate is the highest amount a provider will be paid for the ERDC subsidy, which varies by rate area. Prior to 2020, each rate area had a different maximum amount, with Rate Area A set at the highest, Rate Area B in the middle, and Rate Area C as the lowest reimbursement rate. Starting in 2020, Rate Area C facilities are reimbursed at the same reimbursement rate as Rate Area B. Maximum reimbursement rates also vary whether the provider is licensed (regulated by the state) or unlicensed (license exempt). The licensed maximum reimbursement rate is used in this report.

The state subsidy’s maximum payment rate affects subsidy parents’ access to all types of child care in the community. The Federal Office of Child Care defines the 75th percentile of the current child care market prices as the benchmark for equal access, and considers payment rates set at or above the 75th percentile as providing equal access³. In January 2024, the reimbursement rates were set based on an approximation of the 80th percentile of the 2022 Market Price Study.

Findings

Comparison of Rate Areas to Oregon Statewide Prices by Child Care Slots

To test the validity of the three rate areas (A, B, C), we compared Oregon statewide prices to prices in the three rate areas. If the rate areas are valid, we would expect that, within type of care and age group served, Area A prices should exceed the statewide price, Area C prices should be lower than the statewide price, and Area B rates should approximate the statewide price.

Figure 1 display graphs comparing the 75th percentile monthly prices per child care slot⁴ across type of care and age group served. The graphs provide evidence that the three rate areas no longer accurately capture the distribution of prices due to a combination of changes in provider pricing practices and the practice of not allowing zip codes to move to a lower rate area.

Indeed, use of the three rate areas show:

- (a) statewide prices more closely represent rate Area A than B for all types of care,
- (b) there is less distinction between the prices in rate areas B and C, especially for large and small home-based care.

One would expect there to be more distinction in the rate areas if they were accurately describing the price distributions across the state.

Figure 1. Comparison of 2024 Rate Areas and Oregon Statewide Prices by Child Care Slots for Each Type of Care

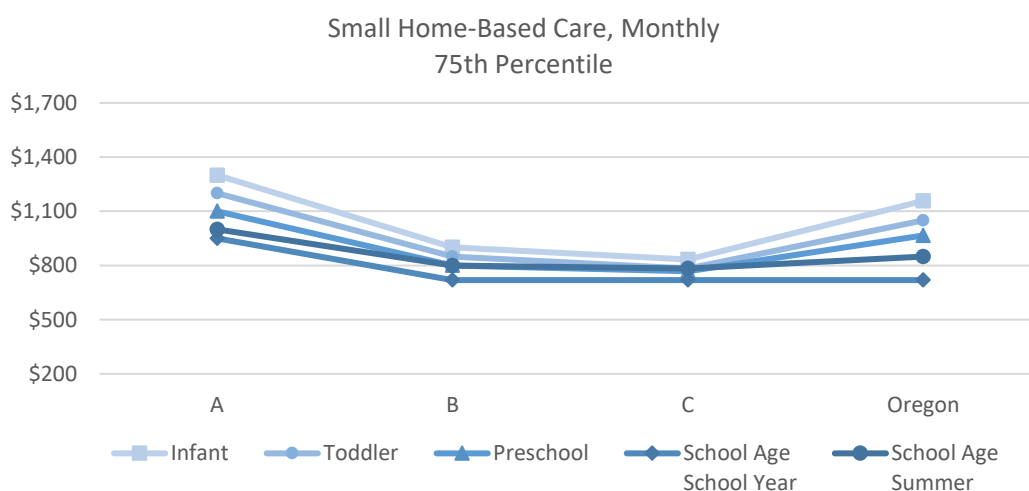

Figure 1

³ For information about the federal Child Care Development Fund payment rates can be found at https://childcareta.acf.hhs.gov/sites/default/files/public/508ed-75th_percentile_exercise.pdf.

⁴ Facilities are not equal in the number of slots they offer to a community, therefore, to more closely represent what is available to families, the price per child care slot was calculated by weighting the reported prices by facility or age group capacity. The 75th percentile of prices is the price level at which 75% of child care slots may be purchased. For prices at various percentiles for all age groups, see Appendices A-C.

Table 1

Small Home-Based Care, Monthly 75th Percentile Rates					
Rate Area	Infant	Toddler	Preschool	School Age School Year	School Age Summer

C	\$1,350	\$1,047	\$1,000	\$940	\$1,067
Oregon	\$1,809	\$1,675	\$1,466	\$900	\$1,150

For a complete list of hourly and monthly rates for each rate area and statewide by percentile, type of care, and age group, see [Appendix A](#) (Small Home-Based), [Appendix B](#) (Centers), and [Appendix C](#) (Large Home-Based). In addition, [Appendix D](#) presents the statewide 75th percentile full-time prices for child care slots by type of care and age groups served.

Accessibility Based on Subsidy Maximum Payment Rate

The ERDC subsidy maximum payment rate can impact subsidy parents' access to child care in their community. The Federal Office of Child Care defines the 75th percentile of the current child care market prices as the benchmark for equal access, and considers payment rates set at or above the 75th percentile as providing equal access.

Using the licensed maximum subsidy rate, we explored access in three ways:

- (1) percent of slots statewide that can be purchased at the maximum full-time subsidy rate.
- (2) percent of facilities with prices at or below the maximum full-time subsidy rate.
- (3) percent of facility care by zip code that can be purchased at the subsidy rate; this measure was created to determine if the amount of access varied by geographic location.

To answer these questions, toddler prices are used as they were found to be closest to the combined price, and most representative of all age group prices. Toddler prices were also used as the basis for grouping price data in previous studies.

Percent of Slots that can be Purchased at the Maximum Full-Time Subsidy Rate

In Oregon, current licensed rate maximums⁵ are adequate to purchase approximately 64% of toddler slots statewide. Of the 9,718 toddler slots in market care statewide, 6,183 are at facilities that charge prices at or below the current licensed rate maximums. This also varies by type of care, with the current maximum rate able to purchase 73% of slots for large home-based, 62% of slots for centers, and 56% of slots for small home-based care.

Table 4

Percent of Child Care Toddler Slots that can be Purchased at Full-Time Licensed Rate Maximums by Type of Care

Rate Area	# of Toddler Slots	Slots at facilities with prices less than or equal to the licensed rate maximum	
		#	%
State	9,718	6,183	64%
Small Home-Based	1,661	931	56%
Center	5,607	3,453	62%
Large Home-Based	2,450	1,799	73%

The percentage of slots that can be purchased statewide with the value of ERDC maximum payment rates increased from 55% in 2020⁶ to 65% in 2022⁷, and then remained stable at 64% in 2024. This also varied by type of care, with the percentage of slots that can be purchased with the maximum rate decreasing for small home-based care from 69% in 2022 to 56% in 2024, while remaining stable for center and large home-based care.

Table 5

Percent of Toddler Slots that can be Purchased at Full-time Licensed Rate Maximums, 2020 - 2024

	2020	2022	2024
State	55%	65%	64%
Small Home-Based	67%	69%	56%
Center	51%	62%	62%
Large Home-Based	61%	72%	73%

⁵ ERDC Rate Maximums for 2024 ranged from \$5.67-14.67 hourly and \$867-1,997 monthly for Rate Area A and \$4.33-7.75 hourly and \$629-1,350 monthly for Rate Areas B & C.

⁶ ERDC Rate Maximums for 2020 ranged from \$4.00-7.00 hourly and \$750-1,404 monthly for Rate Area A and \$3.50-5.00 hourly and \$555-785 monthly for Rate Areas B & C.

⁷ ERDC Rate Maximums for 2022 ranged from \$5.00-10.00 hourly and \$960-1,705 monthly for Rate Area A and \$4.00-6.25 hourly and \$700-1,083 monthly for Rate Areas B & C.

Percent of Facilities with Prices at or Below the Maximum Full-Time Subsidy Rate

At a facility level, 68% of facilities offer toddler prices less than or equal to the licensed rate maximum. This also varies by rate area. As illustrated in the table below, potential access is higher in Rate Area C (78%) and lowest in Rate Area B (63%).

Table 6

Number and Percent of Facilities in 2024 that are Below or Equal to the Toddler Licensed Rate Maximum, by Rate Area

Rate Area	# of Facilities	Facilities with rates less than or equal to the licensed rate maximum	
		#	%
State	1,788	1,210	68%
A	992	680	69%
B	591	370	63%
C	205	160	78%

The percentage of facilities offering toddler rates less than or equal to the licensed rate maximum increased from 66% to 73% between 2020 and 2022 and decreased to 68% in 2024. Across all years, potential access was highest in Rate Area C and lowest in Rate Area B.

Table 7

Number and Percent of Facilities that are Below or Equal to the Toddler Licensed Rate Maximum, by Rate Area

	2020	2022	2024
State	66%	73%	68%
A	66%	72%	69%
B	63%	71%	63%
C	77%	83%	78%

Percent of Facilities by Zip Code that can be Purchased at the Subsidy Rate

Child care providers are divided into rate areas based on zip codes, see [Appendix E](#) for a complete list of rate areas by zip code. The following table provides the number and percent of zip codes by breakdown of the percent of facilities that charge at or below the licensed rate maximum. Financially, ERDC licensed rate maximums allow families access to the majority (75%) of facilities for small home-based care in just over half (51%) of Oregon zip codes, for centers in just over two-thirds (68%) of zip codes, and for large home-based in just under two-thirds (65%) of zip codes. The ERDC licensed rate maximums are not adequate to fully purchase any small home-based market care in 14% of zip codes, center care in 6% of zip codes, and large home-based care in 6% of zip codes.

Table 8

Breakdown of the Percent of Facilities Priced at or Below the Toddler ERDC Licensed Rate Maximums by Zip Code

Percent of facilities that charge at or below the maximum subsidy rate	Small Home-Based Care		Center Care		Certified Care	
	Number of Zip Codes	Percent of Zip Codes	Number of Zip Codes	Percent of Zip Codes	Number of Zip Codes	Percent of Zip Codes
0%	23	14%	9	6%	8	6%
1% to 25%	3	2%	1	1%	1	1%
26% to 50%	24	15%	17	12%	16	12%
51% to 75%	30	18%	18	13%	21	16%
Greater than 75%	84	51%	94	68%	86	65%
Totals	164	100%	139	100%	132	100%

The number of zip codes for center and large home-based care is lower than small home-based care because a larger number of zip code areas have small home-based child care facilities than have centers or large home-based care. Zip codes with no providers are excluded from the analysis.

Conclusion

The high-level findings for this report are summarized below:

- The comparison of rate areas to statewide prices showed that statewide prices more closely represent Rate Area A than B for all types of care. Also, there is little distinction between the prices in Rate Area B and C, especially for large and small home-based care. One would expect there to be more distinction in the rate areas if they were accurately describing the price distributions across the state.
- Current licensed rate maximums are adequate to purchase approximately 64% of toddler slots statewide with variation in access by type of care (56% of slots for small home-base, 62% of slots for centers, 73% of slots for large home-based care).
- Across facilities, 68% of facilities offer toddler prices less than or equal to the licensed rate maximum, however this percentage varies by rate area (69% of facilities in Rate Area A, 63% in Rate Area B, and 78% in Rate Area C).
- Within zip codes, the percent of facilities that can be purchased with the subsidy rate indicates that accessibility varies across zip codes. The percentage of zip codes where the majority (over 75%) of facilities charge at or below the subsidy rate varies by type of care: for small home-based care, just over half (51%) of Oregon zip codes; for centers, just over two-thirds (68%) of zip codes; for large home-based care, just under two-thirds (65%) of zip codes.

This report further illustrates that the three rate areas are no longer a valid representation of how market prices group geographically, as provider pricing practices have changed. This report is to be used as a tool alongside the 2024 Market Price Study Report, which uses statistical clustering to define price clusters across the state, to inform decision making around rate setting in light of how prices vary by type of care and geography.

Facility rates represent average rates at the facility level. Slot rates were calculated by weighting the reported prices by total age group capacity.

¹For small home-based care, hourly was the most predominate mode facilities used to charge parents through 2018. In 2020, hourly and monthly were both used about equally. In 2022 and beyond, monthly became the most predominate mode used. Therefore, both hourly and monthly are reported over time for small home-based care.

²In 2022, school-age programs were only able to report prices in one data collection field, thus the 2022 rates are listed under school age school year, but this is likely a mixture of both school year and summer care.

³School-age center prices should be interpreted with caution, see Methodological Issues for more information.
