**Curriculum Development:**

Oregon State University

KIN 432/532 Physical Activity Assessment (Fall 2014). **Role: Leader.** This course was developed to fill curricular gaps in the area of physical activity assessment within the Kinesiology undergraduate and graduate programs. Additionally, the graduate course (KIN 532) was developed as an integral component of the Physical Activity Option within the Master of Public Health program in the College of Public Health and Human Sciences.

KIN 535 Physical Activity Promotion (Fall 2015). **Role: Leader.** This course was developed to fill a curricular gap in the area of physical activity promotion within the Kinesiology graduate program. Additionally, the course was developed as an integral component of the Physical Activity Option within the Master of Public Health program in the College of Public Health and Human Sciences.

KIN 325 Fitness Assessment & Exercise Prescription. **Role: Leader.** This course was further developed during Fall 2020 to offer an Ecampus version (first offered – Winter 2021). Development of assessments, tutorials, and assessments for Ecampus delivery was accomplished as part of this re-development.

Physical Activity Option – Master of Public Health (MPH; Spring 2016 – 2023). **Role: Program Coordinator and Development Leader.** I have led the successful development (from inception to full approval) of the Physical Activity Option of the Master of Public Health degree within the College of Public Health and Human Sciences. I personally developed two new graduate courses (KIN 532 – Physical Activity Assessment; KIN 535 – Physical Activity Promotion) and assisted in developing three other courses (KIN 531 – Physiology of Physical Activity and Inactivity; KIN 536 – Physical Activity in Diverse Populations; H 563 – Physical Activity Epidemiology) for the approved option.

KIN 394 Professional Activities: Resistance Training Program Design (Fall 2017 – Summer 2018) **Role: Leader.** This course was changed by moving it from 2- to 3-credits and the addition of professional development-related content.

4. Barreira, T. V., & **Schuna, J. M., Jr.** (*Not Accepted*). Beyond the “black box”, open-source processing of raw accelerometer data. Tutorial submitted for consideration at the upcoming (2020) American College of Sports Medicine Annual Meeting – San Francisco, California, USA.
5. Manore, M. M., & **Schuna, J. M., Jr.** (*Accepted*). WAVE Ripples for Change: Sport nutrition as a ‘carrot’ to promote healthy eating and life-long PA in active youth. Colloquium submitted for consideration at the (2020) American College of Sports Medicine Annual Meeting – San Francisco, California, USA (Cancelled – COVID-19).
6. Manore, M. M., Paton-Lopez, M., & **Schuna, J. M., Jr.** (May, 2021). WAVE Ripples for Change: Sport Nutrition as a ‘Carrot’ to Promote Healthy Eating/Life-long PA to Active Youths. Colloquium presented at the American College of Sports Medicine Annual Meeting – Washington D.C., USA

### **Invited Speaker Presentations**

1. **Schuna, J. M., Jr.** (March, 2015). Advantages and pitfalls of wearable monitors for objective physical activity assessments: Future applications for health-related research. Invited oral presentation for the College of Public Health and Human Sciences’ Research Seminar – Oregon State University – Corvallis, Oregon.
2. **Schuna, J. M., Jr.** (April, 2015). Beyond the school walls: Novel strategies to promote children’s physical activity outside of the traditional school day. Invited keynote oral

presentation at the Northland Chapter American College of Sports Medicine Meeting – St. Cloud State University – St. Cloud, Minnesota.

3. **Schuna, J. M., Jr.** (April, 2015). Global childhood obesity: A historical perspective and the importance of physical activity to children’s health. Invited keynote oral presentation at the Northland Chapter American College of Sports Medicine Meeting – St. Cloud State University – St. Cloud, Minnesota.
4. **Schuna, J. M., Jr.** (February, 2017). Objective physical activity monitoring for healthrelated research: A discussion of methods, deployments, and data presentations. Invited oral presentation at the Moore Family Center Food, Nutrition, & Health Update – Oregon State University – Corvallis, Oregon.
5. **Schuna, J. M., Jr.** (March, 2019). Changes in guidance: Implications of the Physical Activity Guidelines for Americans, 2<sup>nd</sup> Edition. Invited oral presentation for the College of Public Health and Human Sciences’ Research Seminar – Oregon State University – Corvallis, Oregon.
6. Schuna, J. M., Jr., (April, 2024). Tracking energy expenditure and physical activity: How accurate are those apps? Invited oral presentation for the Cardiovascular Health and Wellbeing dietetic practice group of the Academy of Nutrition and Dietetics – The University of Arizona – Tucson, Arizona.

## Software

1. Physical Activity Accelerometer Data Processing (PAADP) Software (2024 – In beta). Multi-platform (Windows, MacOS, & Linux) and open-source software suite designed for processing and summarizing raw accelerometer data collected from physical activity assessment. Current capabilities include 1) resampling of raw accelerometer data to desired sampling frequencies using bandlimited-interpolation, 2) calculation of signal vector magnitude (SVM), Euclidean norm minus one (ENMO), mean amplitude deviation (MAD), estimated activity counts (ActiGraph equivalent), and steps, and 3) epoch-based summarization of the aforementioned variables to daily and weekly levels.  
Role: Lead Developer & Software Engineer  
Access: [GitHub - schunajm/PAADP: Physical Activity Accelerometer Data Processor](https://github.com/schunajm/PAADP:Physical-Activity-Accelerometer-Data-Processor)

## Hardware

1. Physical Activity Data Capture (PADC) Accelerometer (2024). Modularly built and opensource physical activity accelerometer intended for use by researchers and individuals interested in tracking their own physical activity. The device costs approximately \$30 to manufacture - roughly 1/10<sup>th</sup> the cost of the industry standard (ActiGraph wGT3X-BT). We are currently conducting several studies to establish the reliability and validity of the PADC accelerometer.

Role: Lead Developer & Hardware Engineer
