(Inter)National Epi/EH/Lab Contact List
Brought to you by FOMES, the Oregon Food Safety Center of Excellence

Where It Lives:
https://epiweb.oha.state.or.us/fmi/webd/State%20Epi%20Offices

How It Works:
Oregon maintains this public-facing database and keeps it hosted on the web; epidemiologists and laboratorians use this system to find contact information for their public health partners in other jurisdictions.

Users from various jurisdictions (e.g., states, provinces, territories, large municipal areas) check the list periodically to keep contact information updated (phone and fax numbers, email addresses and URLs) for the following offices:

- General CD Epi
- Enteric/Foodborne Outbreaks
- Immunization
- Public Health Lab
- TB
- STDs
- After Hours CD
- After Hours Other

How To Verify/Update Your Jurisdiction’s Info:
1) Navigate to the URL above
2) Select your jurisdiction
3) Verify or update contact information
4) Check the box (bottom left) and enter your name to confirm verification
