Positional Biography. Professor tenured in the College of Public Health and Human Sciences, School of Biological and Population Health Sciences, with a primary faculty appointment in Family and Community Health, serving as Extension Specialist for Health Equity and Place, and core graduate faculty in the Kinesiology (Psychosocial), Physical Activity in Public Health. Participatory research and mixed methods GIS (QUAN with QUAL) approaches employed to engage and mobilize communities to discover, learn, and act on the place-based, social-environmental determinants of health inequities in residential populations, specifically differences in resource access and risk exposure that influence behavior (e.g. physical activity), health and well-being outcomes and disparities in and between groups. Faculty research, graduate teaching and advising, and Extension engagement efforts aimed toward rural populations/subpopulations (intersectional identity groupings) and rural community place-based contexts (spaces, sectors, SDOH), such as Native American tribal communities and community contexts in South Dakota.
