## **A. EDUCATION & EMPLOYMENT**

### **Education**

- PhD, School of Population & Public Health, University of British Columbia 2013
- MSc, Geography, University of Victoria 2007
- BSc. (Honor), Geography, University of Victoria 2004

### **Professional Experience**

- Assistant Professor, College of Public Health and Human Sciences, OSU 2013 – present
- Researcher, Cancer Care Ontario 2012 – 2013
- Research Consultant, Health Canada 2012 – 2013
- Consultant, Environment Canada 2011 – 2013
- Researcher, Carex Canada, University of British Columbia 2007 – 2013

**Curriculum Development at Oregon State University**

- H513, Integrated Approaches to Public Health: Member of the integrated core team that is creating and delivery H513. This is a 12 credit course has been developed in response to the CEPH national initiative to transform public health degree programs to meet the needs of Public Health in the 21<sup>st</sup> century.

- H513 (Hybrid), Integrated Approaches to Public Health: Member of the integrated core team that is modifying H513 to be a hybrid course. Given this is a 12 credit class we wanted to reduce the amount of class time that was devoted to lectures and provide more flexibility for students to gain this information. Hence, we are now providing most of the foundational public health information through different online formats and using class time for in-depth case studies that pull weekly content together.
- H 547, GIS and Public Health: This course was developed to fill the need for an introduction course to geographic information systems (GIS) and public health in the college. A lab portion of the course gives students hand-on experience applying GIS to different public health case-studies.
- H592, Spatial Epidemiology: This course was developed to provide students an opportunity to apply GIS in advanced applications to epidemiological research. The course is based around a project where students develop a research question and answer their question using spatial data and analysis methods. Students create a poster of their final project and are invited to present at the Annual Semiahmoo EOH conference.
- H 642, Environmental and Regulatory Risk Assessment: This course was developed with Dr. Kile to fill the need for a risk assessment course focused specifically on environmental and occupational risk factors.
- H 683, Advanced Research Methods: This course was developed to fill the need for an advanced research methods course in EOH. Advanced research methods are covered, including framing environmental and occupational health issues into testable hypotheses, designing appropriate studies, and identifying strengths and weaknesses of different research methods.

### Current Grant Support

1. Long-term Outdoor Air Pollution and Cause-Specific Mortality in a Pooled Analysis of 23 Asian Cohorts. *Health Effects Institute*. \$900,000. Co-Investigator. PI: Dr. Roel Vermeulen. 06/2018-05/2020.
2. PURE-Air: A Global Assessment of Outdoor Air Pollution and Cardiopulmonary Disease. NIH Director's Early Independence Awards (DP5). \$1,669,859. Principle Investigator. 30/09/2014-30/08/2019.
3. Assessing Health Effects of Long-term Exposure to Low Levels of Ambient Air Pollution. *Health Effects Institute*. \$1,707,314. Co-Investigator. PI: Dr. Michael Brauer. 2016-2020.
4. Air Pollution and Health in the Prospective Urban and Rural Epidemiological Study. Canadian Institute for Health Research (CIHR). \$753,674. Co-Investigator. PI: Dr. Michael Brauer. 07/2014-06/2018

### Submitted Research Grants

1. PURE-Climate: Determining Climate Drivers of Chronic Disease and Adaptation Measures. *Wellcome Trust*. \$750,000 (pounds). Principle Investigator. Submitted October 2018.

2. Applying Deep Learning to Street View Imagery for Environmental Health Research. *National Institute on Environmental Health Sciences*. \$407,000. Principle Investigator. Submitted October 2018.
3. An Experimental Study of Physiological Stress Responses to Urban Green Space *National Institute on Environmental Health Sciences*. \$410,000. Principle Investigator. Submitted November 2018.

### Planned Grant Submissions

1. Life-course Influences of the Built Environment on Chronic Inflammation: Leveraging Twin Pairs and Long-Term Exposure Measures. \$1,800,000. Principle Investigator. Submitting February 2019 to NIEHS.

### Past Grant Support

1. Air Pollution Exposure Assessment for the Asian Cohort Consortium. National Cancer Institute. \$25,000. Principle Investigator. 2016-2017.
2. Applications of GIS to County Public Health Activities. Clackamas County. \$25,000. Principle Investigator. 2017.
3. Determining the Population Attributable Risk of the Major Modifiable Cancer Risk Factor in Canada. *Canadian Cancer Society Research Institute*. \$789,804. Co-Investigator. PI: Dr. Friedenreich. 30/10/2014-30/09/2017.
4. Development of hybrid models to predict spatially and temporally resolved air pollution concentrations at local and national scales. Clean Air Regulatory Agency. \$110,000. Collaborator. PI: Dr. Johnson. 04/01/2014-07/31/2016.
5. GROW healthy kids and communities. *USDA Agriculture and Food Research Initiative: Childhood Obesity Prevention NIRA: 2010-04614*. \$4,870,000. Co-Investigator. PI: Dr. John and Dr. Gunter. 2/1/2011-1/31/2016.
6. Spatial data mining: Exploring co-location of adverse birth outcomes and environmental variables. *National Sciences and Engineering Research Council of Canada*. \$585,047. Co-Investigator. PI: Dr. Osornio Vargas. 2013 – 2016
