

2017 Child Care and Education Characteristics: Structural Indicators of Quality

Columbia County Overview by Type of Care

Oregon has data for all regulated programs on characteristics of child care that research has found to predict quality. These conditions are associated with how the program interacts with children and families. When these conditions, known as structural indicators of quality, are strong, there is a greater likelihood that interactions and activities will support children’s development. Oregon partners collect data from all regulated child care and early education facilities and produce annual reports on the following structural indicators: education and step levels, training, center teacher compensation (wages and benefits), retention, and accreditation by a nationally recognized accrediting body. Oregon measures structural indicators of quality for all regulated child care and education programs annually.

The following profiles provide an overview of the 2017 structural indicators for facilities in Columbia County by each type of care.
