

2020 Estimated Supply of Child Care and Early Education Programs in Oregon

This document contains tables with information about Oregon’s child care supply as of March 1, 2020 (pre-COVID). The Estimated Supply dataset is compiled by the Oregon Child Care Research Partnership at Oregon State University using data collected by the Resource & Referral system through a biennial update managed by Central Coordination at Western Oregon University. Results of the Estimating Supply analysis have been used since 1999 to track Oregon's early care and education supply over time.

The following are a collection of tables that include an overview of the number of providers and slots in early care and education, the supply by age group, the percent of child population who have access to a slot, and an overview of publicly funded slots.

Information is provided for the overall supply as well as supply by type of care and the main types of regulatory status: regulated, recorded, and exempt. In addition, information is provided by age group and regulatory type at the county level. Age groups are divided into 0-2 year olds, 3-5 year olds, and 6-12 year olds.
