

2024 Estimated Supply of Child Care and Early Education Programs in Oregon

This document contains tables with information about Oregon’s child care supply as of December 2024. The Estimated Supply dataset is compiled by the Oregon Child Care Research Partnership at Oregon State University using data collected by the Resource & Referral system through a biennial update managed by Central Coordination at Western Oregon University. Results of the Estimating Supply analysis have been used since 1999 to track Oregon's early care and education supply over time.

The following are a collection of tables that include an overview of the number of providers and slots in early care and education, the supply by age group, the percent of child population who have access to a slot, and an overview of publicly funded slots.

Information is provided for the overall supply as well as supply by type of care and the main types of regulatory status: licensed, recorded, and exempt. In addition, information is provided by age group and regulatory type at the county level (available by Early Learning Hub by request). Age groups are divided into 0-2 year olds, 3-5 year olds, and 6-12 year olds.

Licensed Oregon Child Care Supply for Children Under Age 13: 1999-2024

*2020 is pre-COVID

Data Source: Estimated Supply of Child Care in Oregon. Analysis by Oregon Child Care Research Partnership at Oregon State University using data collected by the CCR&R system during a three-month period in the given year. The number of slots reflects the *desired capacity* of facilities (i.e., the number of children a program prefers to enroll), therefore this number may differ from the total capacity that a facility may be licensed to serve.
